

**Spectrum Positive Identity and Training Ltd** is pleased to announce a new Biometric Fingerprint Recognition system to complement its existing range of identity products.

As well as providing a quality range of Photo ID Cards and accessories Spectrum is now able to offer innovative Biometric fingerprint recognition with ClockInOut software control. This expanded range of services gives you a flexible choice of products to enhance your business and staff security requirements.

### Benefits of Biometrics

- Eliminates buddy blocking
- Eliminates time sheet and paper
- Flexitime automated and easy to use
- Management

### What can I use the system for?

- You can easily and accurately monitor time keeping and attendance.
- You can quickly log visitors and sub-contractors. The system can even log car registration numbers, badge numbers or whom a person is meeting.
- This system would easily allow for a flexitime system as total hours for specified time periods can also be calculated
- You can quickly display a report to tell you who is on site at a current point in time.

**Spectrum Positive** are here to provide you with solutions to your personal, business, security and access control needs.

Contact us today on **08000 190 299** to discuss your requirements.

If Photo ID is your requirement, Spectrum can provide you with your cards in 6 simple steps.

1. Select your ID Card Style from the Spectrum Style Sheet
2. Complete the Spectrum ID Card Order Form
3. Email your logo and images with the Order Form to [info@spectrumpositive.co.uk](mailto:info@spectrumpositive.co.uk)
4. Approve the proof that we email to you
5. Approve the demonstration card posted to you
6. Distribute your ID cards to your staff and members

We can proof and produce your cards within 10 days.

For your ClockInOut biometric finger print recognition information, please email your details and we will arrange a call to discuss your requirements.

## **Your Frequently asked ClockInOut questions answered**

### ***Will the system be an infringement of the privacy of my staff?***

Not at all as this device only stores a numerical data impression of a finger which cannot be converted back to a fingerprint.

### ***How long will it take to register a new user to the system?***

It takes about 30 seconds to register a single finger, simply enter their name and let the system take 3 sample readings; it's quick enough to register visitors and sub-contractors.

### ***What if a member of my staff has a minor cut on their finger or it's bruised or dirty?***

The reader takes its image from tissues below the surface of the skin, so minor skin abrasions are not a problem.
